

VL Vertical vibration isolation platform

Feature:

VL series platform using V series of vibration isolator, the use of low table design, to meet the requirements of the test system requires a lower center of gravity.

Load capacity 500 ~ 800 kg

Inflation pressure up to 0.6Mpa (6kg / cm²)

Natural frequency Vertical direction <3HZ Horizontal direction <5HZ

Table flatness 0.10 mm / m²

Table hole from the 25mm / 26mm

Applications:

★Optical microscopes 、 Precision inspection stations 、 Highly sensitive laboratory equipment 、 High-accuracy measuring instrument

Specifications:

According to the actual needs of custom size.
